

Amazing statistics of Aussie Helpers work in the bush

More than 3,000 farming families assisted in varying ways

More than 300 tonnes of groceries (15 semi trailer loads) freely given away

More than 4,000 tonnes of stock feed (200 semi trailer loads) freely given away

More than 20 tonnes of personal hygiene and pamper packs freely given away

Thousands of toys and sporting goods freely given to bush kids

Hundreds of face to face counseling visits of depressed farming people

More than twenty lives saved from suicide

More than one and a half million kilometres travelled by our volunteers to assist farming families in all over Australia

Numerous free concerts put on with Lee Kernaghan (Spirit of the Bush)

Numerous free concerts put on with the Prairie Oysters Band (When the Dust Settles)

All this achieved without government funding

AUSSIE HELPERS LTD

Aussie Helpers Ltd is a non profit registered charity that has been operating since 21 May 2002.

The charity is operated by some forty volunteers working in Queensland, NSW, Victoria, South Australia and have assisted farmers in Tasmania and Western Australia. These volunteers fully embody the spirit of volunteering, freely giving their own time and expertise (in many cases at their own expense), they have created a charitable association that is strongly supported by local communities including citizens and small business's, many of whom have donated and supplied goods and services to enable Aussie Helpers to achieve its goal of "helping to fight poverty in the bush".

This bonding of ordinary people and the business community has created a feeling in the community of a profound sense of community spirit which has made it a priority to help others

less fortunate and those who are going through tough times.

Aussie Helpers impact on the people and places that we connect with and is fully verified by the hundreds of letters we receive each year from farming families assisted by Aussie Helpers.

Aussie Helpers visits to farming families are not meant to solve any major problems however at times just knowing that someone cares about them and their difficult situation in the bush offers a little hope of better days ahead.

Many people are astounded that such an organization such as 'Aussie Helpers' even exist let alone does what it does for people in the bush.

The beneficiaries of Aussie Helpers activities are genuine people who are going through really tough times. The majority of the people Aussie Helpers deal with would not ask for help nor expect it. Once these farmers get back on their feet the flow on will benefit the rural communities and country towns.

Aussie Helpers have proven beyond doubt that if people are fully committed to a worthwhile cause the local communities will embrace the organization that in turn instills a sense of pride, even if they are not a member of the organization, that people can relate to what is being achieved in their communities.

The long term effect of the work done in all aspects, counseling, visits, excursions, human food, stock feed and work with unwanted homeless people all culminate into building and strengthening the families in the bush, the farming communities the country people and the country towns.
